How It Works

Simple by design — four steps to putting capital to work.

1

Businesses List Opportunities

Businesses create funding opportunities with clear details: purpose of funding, amount needed, expected timeline, and return structure.

2

People Choose What to Fund

Users browse verified businesses and select opportunities they believe in — filtering by industry, deal size, and timeline.

3

Capital Is Contributed Directly

Funds are allocated directly into selected business opportunities — no intermediaries, no delays, no opaque routing.

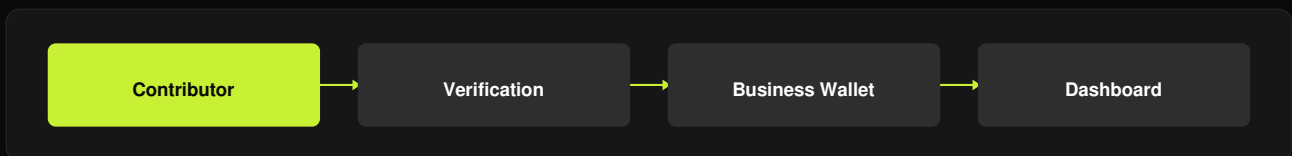

4

Progress Is Tracked

Each opportunity is tracked until completion, ensuring transparency throughout the full funding cycle.
